

Malle « Évolution de la denture » CDRS 21	Descriptif
 The image shows eight dental models arranged in two rows of four. Each model represents a half of a human jaw (maxilla or mandible) at a specific stage of dental development. The top row shows the upper jaw (maxilla) and the bottom row shows the lower jaw (mandible). From left to right, the models illustrate the progression from a newborn (neonate) to a young adult. The teeth are color-coded: primary teeth are shown in pink and deciduous teeth in yellow. The models are mounted on black circular bases.	<p>Moulage de 4 demi-mâchoires supérieures et inférieures. 4 étapes principales du développement de la denture (avec numérotation) :</p> <ul style="list-style-type: none">• nouveau-né,• enfant de 5 ans,• enfant de 9 ans• jeune adulte.
